

VELLO

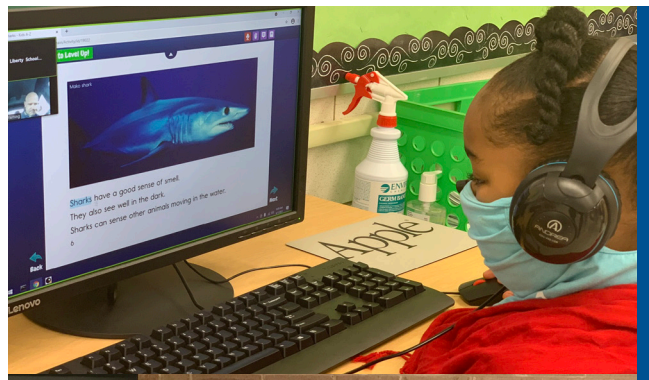

71% of students said reading with a Vello volunteer made them feel a lot better about their reading.

84% of teachers affirmed improved overall reading progress.

70% of parents reported improved reading engagement at home.

Vello is an initiative designed to improve students' reading skills (fluency, accuracy, comprehension, vocabulary, etc.) and overall engagement in reading activities.

For teachers, Vello offers instructional resources designed to increase and support home and parental engagement in their child's reading progress and skill building.

Vello consists of one-on-one tutoring with a United Way volunteer and an e-library. We offer over 50,000 digital literacy resources, a web Portal for training and scheduling, and the caring power of our community partners. We support the entire classroom, whether virtually or face-to-face.

Our volunteers build transformational relationships with students and seek to foster a life long love of reading.
